

# LOGISTICS FOR THE TIMBER INDUSTRY

“When trees are felled the chips fly...”

Rhenus is a specialist in supply and distribution logistics for all forestry and wood products. We organise the entire transport chain from the forest to wood processor and offer solutions for all your products ranging from residual wood logistics to distribution channel solutions for timber, veneers and derived timber product panels. Moreover, we can supply your biomass power plant and recycle production residues.

## Services

- Blanket presence throughout Germany and abroad with extensive storage capacities (outdoor storage, covered stockpiles, indoor storage) and access to the global network of the Rhenus Logistics Group
- Special equipment (grabs, loaders, cranes, screening/elevator systems, drying, weighers, etc) for the handling and storage of all forestry products (such as round timber, sawn timber, panels, veneers, cellulose, paper, residual wood products/bulk materials, and recycling materials)

## Trading centre for timber

- Operator of traditional port trading centres at Nordenham and other Rhenus seaports at the interface between sea and inland ports for the complete handling of our clients' timber trading, import and export
- Timber-processing activities are focused at Rhenus Midgard Forest Logistics GmbH & Co.KG based at Nordenham-Blexen, including a complete contract sawmill (contract cutting for clients) and a computer-controlled wood-drying unit for more than 1,500 cubic metres of sawn timber.

## Cooperation

- Cooperation with transport contractors worldwide
- Transhipment between broad and standard gauge

## IT services

- Individual IT solutions
- Intelligent warehouse management

## Transhipment, storage and transport

- National and international transport by road, rail, sea and inland waterways
- Transhipment, storage and distribution of general cargo (building materials, timber, etc) and all types of bulk (e.g. pellets, fertiliser) by ship, freight car and road
- Organisation of sea transport
- Organisation of intermodal hinterland transport

## Supplementary services

- Acceptance of consignments of wood in the country of origin and organisation of the entire transport chain
- Distribution of semi-finished and finished products to the customer (as required, including by lorry/rail)
- Sawing of round timber/technical drying of timber
- Stripping and stuffing of containers/international container traffic
- Quality and quantity control, picking
- Packing, filling, repicking, etc (including bagging of bulk, refilling of big bags, etc.)
- Interim storage, transport insurance, customs clearance and documentation
