

COAL LOGISTICS

Rhenus has been a major partner of the European energy sector and steel industry for years. We provide logistics to supply power plants with coal, coke, oil coke, secondary fuels and ready-mixed materials and specialize in seaport/inland port transshipment including the expert storage of imported coal, in-plant handling and transport by barge and rail. In addition, we dispose of all residues of combustion making allowance for applicable environmental standards.

Services
