

OUR SERVICES

Engineering and industry

Rhenus realises full-service concepts for manufacturers of engineering products and industrial goods. Our services cover the entire process chain, from procurement to distribution. Because each project has its own requirements, we assemble individual services to form specially customised service packages – including for unusual tasks.

Procurement

- Logistic supplier centres
- All transport by road, rail, sea, air or in combination
- Control and bundling of flows of goods for production supply – throughout Europe and globally
- Collection of components from domestic and foreign suppliers
- Consolidation at strategically favourable hubs
- Central receipt of goods
- Controlling of date, quantity and quality at receipt of goods
- Information and communications management
- Product synchronised supply and disposal of production
- Warehousing

Project logistics

- Special transport
- Provision of domestic assembly areas
- Construction site logistics
- National and international transport control
- Customs processing and documentation

Documentary logistics

- Archive
- Mailroom
- File destruction
- Digitalisation
- Internet based documentary logistics

E-Solutions

- Track & Trace systems
- Mobile data communications
- Interfaces to inhouse systems
- Electronic order placement
- Pro-active monitoring and control of transport chains

Distribution

- Order picking quality control
- Conservation and packaging
- Container stuffing
- Drafting of transport documentation
- Export processing
- Precise control of flows of goods
- National and international scheduled traffic with fixed departure times
- Charter service and JIT traffic
- Transport of hazardous goods, special goods and heavy loads
- Customs processing and documentation

Production

- Bill of materials explosion and stock control
- Module assembly including quality control and documentation
- Just-in-time supply of assembly
- Voucherless company-internal transport
- Production removal
- Storage of end products
- Empties management
- Personnel assignment
- Facility management
